

## Contract histomorphometric analysis

### Key Facts

- The Dental Clinic of the University Medical Center Freiburg is one of the few institutions offering such analyses
- Decades of experience in specialized histological preparations
- Embedding of samples in PMMA, with 2-3 saw cuts per sample followed by grinding
- Specialized histological analysis of bone biopsies (3 mm trephine)
- You receive a realistic assessment of tissue integration and bone regeneration
- Quantitative area measurement (histomorphometric analysis)
- Optimal for evaluating bone augmentation measures and implant integration

### Our Service Portfolio

- **Histological processing** of dental samples (sectioning, staining)
- **Histomorphometric analysis** (micrograph overview images (50 x), quantitative assessment of newly formed material)
- **Comprehensive histological analysis** (high-resolution micrographs of relevant regions, detailed histological evaluation)

### Prices

Histological processing	*400 €
Histomorphometric analysis	*200 €
Comprehensive histological analysis	*400 €

\*These are net prices, VAT will be added.
